

Erasmus+: NextGen School: Učíme (se) pro zítřek
2025-1-CZ01-KA122-SCH-000338340

**Financováno
Evropskou unií**

Typ akce: KA122-SCH (Krátkodobé projekty mobility žáků a zaměstnanců ve školním vzdělávání)

Datum zahájení projektu: 1.6.2025

Datum ukončení projektu: 30.11.2026

PROJECT DESCRIPTION

Summary

Background

We want to develop students' international cooperation, language and digital skills and strengthen their civic awareness. We want to support the development of social and learning habits, motivate to improve language skills, develop digital competences and a deeper understanding of sustainability and democracy, and to understand Europe's cultural and civic diversity. We also want to establish a long-term relationship with a partner school and to support the competences of teachers.

Objectives

The aim of the project is to promote students' linguistic and digital competences, develop their critical thinking and ability to work together in an international environment. We want them to gain greater confidence in English and learn to use digital tools effectively. The project will enable teachers to learn innovative teaching methods and strengthen their readiness to work with modern technologies and international partners.

Impact

We expect pupils to be able to communicate more confidently in English, produce high quality digital output and deepen their understanding of sustainability and European values. Teachers will learn new teaching methods and improve their language and digital skills, and will stop worrying about organising international projects. Project outputs such as educational videos and presentations will be used in teaching. The school will expand its network of international partners.
